

# See Me Through

## Edison Glass

The words are not there  
When you cannot grasp  
Your heart is scared  
Where can you go? Turbulence, see out the storm  
Through matters of every kind  
Sails are torn, the anchor's gone  
Your words we will find You will see me through  
You will see me through Not unambiguous  
Components of deceit  
The inner workings  
Motivation's replete Neither know nor need to know  
Subterfuge of thoughts so low  
Lead us to depend on you  
For you will see me through You will see me through  
You will see me through  
You will see me through Glorious, my glorious  
I feel you breaking down on me  
Glorious, my glorious  
I feel you breaking down on me  
I feel you breaking down on me You will see me through  
(Even then though my heart is scared)  
You will see me through  
(Even then though my heart is scared)
