

Live

The Bangles

Now, you gotta know
Is that yourself or nothing at all
Oh! You think you live
Well how can you stuck in four walls If you gotta go
You better live your life before you pass away
Don't waste a day
All your life you've been locked in your room
You've never had a chance to roam
Away from home So, you come and go
Well good day, don't waste anytime
Oh! Your life today
It's all familiar, soon you will find If you gotta go
You better live your life before you pass away
Don't waste a day
All your life you've been locked in your room
You've never had a chance to roam
Away from home Live, live, live, live
Live, live, live, live Now, do what you want
Or where you want, it's all up to you
Oh! Like a room
It's nice to do what you wanna do If you gotta go
You better live your life before you pass away
Don't waste a day
All your life you've been locked in your room
You've never had a chance to roam
Away from home If you know by now
What life's about, go on now and live
And if you don't know how
It's not so hard, just let go and live If you gotta go
You better live your life before you pass away
Don't waste a day
All your life you've been locked in your room
You've never had a chance to roam
Away from home Live, live, live, live
Live, live, live, and live
