

A Short Term Effect (Live In Brussels 6/82)

The Cure

Movement
No movement
Just a falling bird
Cold as it hits the bleeding ground
He lived and died
Catch sight
Cover me with earth
Draped in black
Static
White sound
A day without substance
A change of thought
An atmosphere that rots with time
Colors that flicker in water
A short term effectScream
As she tries to push him over
Helpless and sick
With teeth of madness
Jump jump dance and sing
Sideways across the desert
A charcoal face
Bites my hand
Time is sweetDerange and disengage everything
A day without substance
A change of thought
The atmosphere rots with time
Colors that flicker in water
A short term effectA short term effect
A short term effect
An echo
And a stranger's hand
A short term effect
An echo
And a stranger's hand
A short term effect
