

Beat Me Up

Wavves

Memories

They're her reason why

She takes it all

And slowly starts to cry Do you really think I easily bruise?

I ask what about the pain that leads to marble (?)

I just wanna spend some time with you

Some time with you, some time with you And you could beat me up

You could beat me up You're all the enemy

That's my reason why

I love the pain

It makes me wanna die Do you really think I easily bruise?

Or do you have a smoke that I could borrow?

I just wanna spend some time with you

Some time with you, some time with you Or you could beat me up

You could be me up
