

# All Hail Science

## Allegaeon

The greater minds of ancient times  
Imhotep to Democritus  
seek to find and bring to light  
the reasons we exist.  
Theorize, substantialize  
Polymaths by definition  
delve into a brave new world  
of physics and atomism  
All hail knowledge  
All hail science.  
The greater minds of reforming times  
Galileo to Descartes  
move away from older ways  
during this restart  
Philosophize, actualize  
school of thought revision  
expand the understanding of  
the mind and all it's mechanisms  
All hail knowledge  
All hail science.  
Observe, question, research  
Hypothesis, experiment, analysis  
To observe and question  
the workings of the world  
research uncovers, the edge unfurls  
hypothesis, prediction  
of the answer and its flaws  
presenting information  
and factoring the odds  
Solo: Greg  
To test in repetition  
To make absolutely sure  
Experiment, experience  
for certainty of the definite answer  
Analysis verify the idea posed  
Researched and unveiled to the waking world  
Solo: Michael  
The great minds of modern times  
Carl Sagan to Bill Nye  
Dedicate their life, aspire  
to opening our eyes  
Emphasize, globalize  
accepting information  
Plotting out our futures  
and solving our creation.  
All hail knowledge  
All hail science.

All hail knowledge

All hail science.
