

# Lemons Never Forget

## Bee Gees

Incidentally there should some changes made  
You've got to work if you should have to save  
An apple is a fool but lemons never do forget  
You've got to play it cool before they come and throw the net  
Wait a while and straighten out the tie you wear  
You've got to take it easy if you dare  
An apple is a fool but lemons never do forget  
You've got to play it cool before they come and throw the net  
Don't be blind, you've got a thinking mind, stop the bells  
That ring so loud, don't nod your head, you'll draw a crowd  
Just think of everything you've worked so hard to bring  
The lemon sings my song, he's known it all along  
Incidentally there should be some changes made  
You've got to work if you should have to save  
An apple is a fool but lemons never do forget  
You've got to play it cool before they come and throw the net  
Don't be blind, you've got a thinking mind, stop the bells  
That ring so loud, don't nod your head, you'll draw a crowd  
Just think of everything you've worked so hard to bring  
The lemon sings my song, he's known it all along  
Incidentally there should be some changes made  
You've got to work if you should have to save  
An apple is a fool but lemons never do forget  
You've got to play it cool before they come and throw the net
