Freezin

Burning Heads

I'm freezing in a warm room the sun is shining outside
Dark thoughts / Bad moodI can run to another place and try to think of something else
It's just like a ghost haunting my mind pain is still inside
Life goes on outside pain is still inside
And time's passing byWeird love / Strange reaction Weird pain / Hard decisionAlone in a crowded room I can't speak or talk
There is something I can't explainYou told me I should walk away and turn back when I've found the way
To get it out from my brain pain is still inside
Life goes on outside time is passing byWeird love / Strange reaction Weird pain / Hard decisionHow long is it gonna take to forget you
How long is it gonna take to kill you...
My love / My heroinWeird love / Strange reaction Weird pain / Hard decision
