

# Stressed Out

## Babyface

Make you dreams come true, make it  
You're so special  
Listen You so busy worryin' bout  
All of the thing you can to do nothing about  
Maybe it's time to change your route  
Instead of pluggin' in so much you should look out You have so many things  
To smile about  
Like love For all the things you have ever dreamed  
It could work out, so don't stress out  
It will happen if it's meant to be  
So don't stress out things could work out baby We go 'round only once  
Don't waste your time not having fun  
You should live your life, it's all you got  
Like it's always better to live than not You have so many things  
To smile about  
Like love For all the things you have ever dreamed  
It could work out, so don't stress out  
It will happen if it's meant to be  
So don't stress out things could work out baby For all the things you have ever dreamed  
It could work out, so don't stress out  
It will happen if it's meant to be  
So don't stress out things could work out baby Laid back in my arms  
Is where you belong  
Sunshine will defeat the storm  
At the end of the day For all the things you have ever dreamed  
It could work out, so don't stress out  
It will happen if it's meant to be  
So don't stress out things could work out baby For all the things you have ever dreamed  
It could work out, so don't stress out  
It will happen if it's meant to be  
So don't stress out things could work out baby Oh baby, all the things you have ever dreamed  
It could work out, so don't stress out baby  
If it's meant to be, things could work out baby For all the things you have ever dreamed  
It could work out, so don't stress out  
It will happen if it's meant to be  
So don't stress out things could work out baby
