Logic

Destabilization complete. Prepare for departure
Took you long enough
Oh, I'm sorry, your highness.
I'll have to try and ask the asteroid field I had to detour through to not try and kill me next time
Man, I'm just messing with you
Yeah, whatever
So what'd you do on the way over here?
Um, you know, just listening to some oldies
Oldies? Like who?
Logic
Logic? The fuck you know about Logic?
I just listened to his first album on the ride over
Under Pressure?
Yeah, that's the one
Shit
I was actually gonna put in the second one now
Alright, well you know this was the album that changed everything, right?
I know, that's why it's so important
