Turned Off T.v. Blues

Ten Years After

It's a cold and winter's night and the rain is falling down
It's so cold, cold outside, snow is laying all around
There is blackness in my window, and the silence is the only sound

Well I'm sitting and I'm thinking though I like to watch T.V.
It just fills my head with garbage that my eyes ain't supposed to see
Got the turned off T.V. blues now, but I'm lonely as you see

Well I've got a worried feeling, all the pain and misery
Well, it's happening in the world now, even though I cannot see
Though my body is now with you, still my mind is running free

There's just nothing I can do now, though I search from day to day
But the truth is so hard to tell you, and you know it, anyway
It's a cold and winter's evening, I wish my blues would go away
