

Turn the Lights Down

Cavalcade

I find peace in dirty sheets
I see love everywhere I sleep
Holding hands in a world of heat
But no one understands you I can't see you here
I can't hear you clear Turn the lights down
We're gonna shut it out
Close your eyes now
We won't know tomorrow
Only one night, no one's gonna see you here
No ones gonna hear you clear I saw you walking through the street
Streetlights bright on your misery
Stumble down falling from your feet
No one understands you I can't see you here
I can't hear you clear Turn the lights down
We're gonna shut it out
Close your eyes now
We won't know tomorrow
Only one night, no one's gonna see you here
No ones gonna hear you clear Turn the lights down
We're gonna shut it out
Close your eyes now
We won't know tomorrow
Only one night, no one's gonna see you here You always keep me waiting, oh-oh
You always keep me waiting, oh-oh
You'll always keep me waiting I can't see you here
I can't hear you clear Turn the lights down
We're gonna shut it out
Close your eyes now
We won't know tomorrow
Only one night, no one's gonna see you here
