## **Face Down**

## L.A. Guns

Live form Hollywood, the original L.A. GunsIt's true we walk in disbelief Clutching to our faded glory

Trust in me but I'm a thief

Get down on your knees before meWorlds collide, hate fills my mind Tension rising, no surrender

The street's a place where love is dying

All hail to thee thy legal tenderNow you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face down, soNow you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face downAt night the vipers rip my flesh

The bitch from hell is feeding

Scratch my wounds to keep them fresh

She likes 'em young 'n bleedingNow you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face downNow you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face downGreed and hate, fear and shame

Wasted our disaster

Cuts like cancer in my brain

Man, now he's your masterNow you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face downNow you're gonna end up face down

Now you're gonna end up face down

Now you're gonna end up face down
