Got Me Going

Ra

I can't get you out of my head
You said things that should never be saidEverything I know doesn't matter
'Cause I might as well be dumb
Everything I do couldn't help me
'Cause nothing in this world will stop meYou took me over the moment, you walked in the room
I lose my mind every time I see you coming
Should I give in this time although I don't know how
You got me going now, you got me going nowWhy didn't I just walk away
You and I we should never playEverything I know doesn't matter
'Cause I might as well be dumb
Everything I do couldn't help me
'Cause nothing in this world will stop meYou took me over the moment you walked in the room
I lose my mind every time I see you coming
Should I give in this time although I don't know how
You got me going now, you got me goingI'm gonna take you all the way
Electrify the life you're leading
I'm gonna take you all the way
And make you one with meYou took me over the moment you walked in the room
I lose my mind every time I see you coming
Should I give in this time although I don't know how
You got me going now, you got me going nowYou got me going now, you got me going now
You got me going now, you got me going now
You got me going now, you got me going now
You got me going now, you got me going now
