

# What And What Not

## Bayside

Night time fades into day  
And a big mistake you didn't know you made  
See if you can take it back  
You thought that this was what it seemed Fate doesn't care about plans  
You never knew life was a rubber band  
The harder that you pull  
The more it snaps back, the more it hurts Sweetness, did you believe in this?  
They got you good, they got you  
No matter what transpires  
Your will can take you higher now So don't take out frustration on your body  
That junk will make you sorry  
I'm taking my last stand  
And to think they almost got me too Don't confuse bath for rebirth  
Mess around feeling like love is a curse  
But you gotta' make a change before you lose control  
I'm not saying I know what and what not to do We're all torn up from inside out  
And I've had mistakes in my bed once or twice  
But I put it in my closet 'til I finally came to  
And I realized that I always knew what I had to do Sweetness, did you believe in this?  
They got you good, they got you  
No matter what transpires  
Your will can take you higher now So don't take out frustration on your body  
That junk will make you sorry  
I'm taking my last stand  
And to think they almost got me too The time is upon us  
Be who you wanna be, who you wanna be  
Keep moving forward, don't live in the corner  
Be who you wanna be And judges will judge in the classrooms and the courtrooms  
If you keep giving them their say  
I'll be who I wanna be  
So think what you want of me Sweetness, did you believe in this?  
They got you good, they got you  
No matter what transpires  
Your will can take you higher now So don't take out frustration on your body  
That junk will make you sorry  
I'm, I'm taking my last stand  
And to think they almost got me  
And to think they almost got me  
To think they almost got me too
