

Think About It

Jesse McCartney

Shh...Kwame did it
We can never let this get out
Cause if my girl would ever find out
She would pack my things and throw me right up out the door
And you're not worth losin' the house
Or leavin' me to sleep on the couch
Cause see what I got with her is worth so much more
Goin' back and forth not knowin' what to do cause what's at home is just way too much to lose
It's not that you ain't fine just
I can't make my mind up
Oh I couldn't live with myself
If she went away, away
I want us to go down
I just slow my roll now
To spend the night with you
I only see her face, her face
So I need to
Think about it, think about it, about it, think about it, think about it, about it (again, again)
So I need to
Think about it, think about it, about it, think about it, think about it, about it (again, again)
And no I'm not willin' to bet ya
That she won't leave if she catch us
This is way too much pressure
For a man to handle
See I could live with losin' you
But losin' her I just couldn't do
Cause honestly she's the only girl who makes my house a home
Goin' back and forth not knowin' what to do cause what's at home is just way too much to lose
It's not that you ain't fine just
I can't make my mind up
Oh I couldn't live with myself
If she went away, away
I want us to go down
I just slow my roll now
To spend the night with you
I only see her face, her face
So I need to
Think about it, think about it, about it, think about it, think about it, about it (again, again)

So I need to
Think about it, think about it, about it, think about it, think about it, about it (again, again)
Girl I want ya so much
But is it worth losing her love
I need to think about it
Cause I don't wanna break her heart
And she does not deserve this no
When I think about it
It's not that you ain't fine just
I can't make my mind up
Oh I couldn't live with myself
If she went away, away
I want us to go down
I just slow my roll now
To spend the night with you
I only see her face, her face
So I need to
Think about it, think about it,
So I need to think about it, think about it, about it (again, again)
So I need to
Think about it, think about it,
So I need to think about it, think about it, think about it (again, again)
So I need to
THINK
