My Heart Went Cold

The Thermals

Far from the cold
I fall in the dark
the damage is a drain
it treats me apart
i know I can repair
but I don't know where to startmy love is a void
worlds away
words I needed to saymy heart went cold
this I know
I pushed you away
a whoa oh oh
I left my heat untold
I couldn't keep you warm
my heart went coldfar from your voice
lost in the night
the distance between us
is fatal
it swallows the light
I know I can resolve
but I always fall to fight
