

# Cry

## Electrasy

I've cried a million times and it's easy

I've watched a million teardrops fall like rain

I've cried a million times and it's easy to cry againDon't stop, just leave me now to wash away my pain

I've cried a million times and it's easy to cry againI've cried a million times and it's easy

I've lost a million lovers all in vain

I've tried a million times and it's easy to cry againDon't stop, just leave me now to wash away my pain

I've cried a million times and it's easy to cry againDon't stop, just leave me now, you won't stop the rain

I've cried a million times and it's easy

To cry, to cry, to cry again

To cry again...That is all the songs from the album "In Here We Fall"

I don't have the other two albums, so I wouldn't be able to give you the words... if I get them, I'll be sure to send them to you. Farewell
