

# Brace Yourself

## Hazakim

Then the Lord answered out of the whirlwind and said; who is this that darkens counsel by words without knowledge

Brace yourself like a man i will question you , and you will answer me.

Who is this being that questions me? I am the Lord God who made all things

I was there when the morning stars sang together

I spoke to nothing and it all came together

I dwell in unapproachable light

My mercy and grace the only hope to your life

Brace yourself

Everything you see I created all that

And when i return again im gonna take it all back

Who questions my wisdom with ignorant speech

Brace yourself and listen as the infinite speaks

Before who do I stand corrected

Discredit my record

To the man who thinks he can, this question is directed

Brace yourself!

For an answer ill be waiting

Where were you at the extravaganza of creation

When I marked the earth's intricate measurements

And I fiddled with the dirt,mineral, sediment, chemical elements

Should I have started with the core that burns or the crust?

Tell me that the omniscient Lord might learn from the dust

I cause fire to fall then send rain to quench the flame

Then i quiet the storm

I'm the beginning the end

The all in the all

Who wrote the code of cosmic law

The very rules that govern your reality , time and space

Earthly formalities that I can break!

I'm Gideon as he fights the Midianite's

Well at the same time I'm in this Millennium right now.

Can you feel the cub's that crouch in the lion's den?

Or put a hook through the mouth of a leviathan

The skin on his back I tightly sealed it

With bare hand try to pry the shields that his hide is filled with

Better yet try to muzzle his face  
If you survive you wont forget the struggle that takes place.

Can you read from constellations in their seasons  
Can you make legions of angelic beings  
Construct them with brilliant wings  
Deep in the sea's there's creatures human eyes have never seen  
Past your galaxy there's things you puny mind could never dream

Can you make waves behave, and direct all there motions  
Who put gates up in the ocean to keep them from overflowing  
Far beyond way past the orient  
I can make morning come  
By simply talking to the scorching sun  
Who keeps it from shifting distance merely by a few inches  
Further from it you freeze  
Closer you melt in an instant  
But where were you when I measured the galaxies dimensions  
Spoke planets into existence  
Position them in suspension  
Lightning won't flash unless it ask's for my permission  
Thunder wont crash unless it passes my inspection  
In a lifetime you cant get out of galaxies section  
Even if you traveled at 22 million miles per second  
I hold the earth can you school me on the universe  
I knew you from birth  
One day ill lead you back into the dirt  
But way before you were born I showed love in the truest form  
Took upon myself the uniform of human form  
I am lofty and high with an all seeing eye  
So don't be haughty with pride against God the divine King  
I bring down all the proud if you come to me humbly I can call you my child

Who is this being that questions me? I am the Lord God who made all things  
I was there when the morning stars sang together  
I spoke to nothing and it all came together  
I dwell in unapproachable light  
My mercy and grace the only hope to your life  
Brace yourself  
Everything you see I created all that  
And when i return again im gonna take it all back
