

My World

Another Cynthia

I want you in my world x2

You're beginnings of ends
And each have been tied
These things that you like
Never will try
And you'll do your sets
Everything out
What still exists
Was built on doubt

I want you in my world
You can breathe in my world
You can rest in my world
You can smile in my world

You're looking spaceward
Making things tasteless
And you're only able
To look at things faceless
Nothing is new
It's only enough
To get you through
The blessings are tough
And you'll do your sets
Everything out
What still exists
Was built on doubt

I want you in my world
You can breathe in my world
You can rest in my world
You can smile in my world

You have to keep moving
It's the way you are born
The things we get used to
We've long ago torn

I just can't follow the way you have gone

Don't just come over, sing with me a song
I'd love to give you a place you belong
I'd love to make you a path on my own

I just can't follow the way you have gone
Can't you come over, sing with me a song
I'd love to give you a place you belong
Can't you come over and sing me a song
