

# All the Lovers In the World

Gowan

(Lawrence Gowan/Eddie Schwartz)

With urgent hands  
We excited  
A fire so hot  
Two lives were ignited  
Now I'm left here on my own  
But I'll never be alone  
Down forbidden streets I talk with  
Every single step I walk with  
All the lovers in the world (all the lovers in the world)  
Though the lonely night's returning  
I can feel the flame that's burning  
All the lovers in the world  
Virgin lips I have tasted  
Love so pure, not a drop was wasted  
Paradise we shared together  
Lives inside of me forever  
Down forbidden streets I talk with  
Every single step I walk with  
All the lovers in the world (all the lovers in the world)  
Though the lonely night's returning  
I can feel the flame that's burning  
All the lovers in the world (all the lovers in the world)  
Since you touched me  
I can't be free  
This is every lover's destiny  
Down forbidden streets I talk with  
Every single step I walk with  
All the lovers in the world (all the lovers in the world)  
Though the lonely night's returning  
I can feel the flame that's burning  
All the lovers in the world (all the lovers in the world)  
Down forbidden streets I talk with  
Every single step I walk with  
All the lovers in the world (all the lovers in the world)
