

# Double Vision Quest

## Minus the Bear

Caught in the locked groove of this long season  
These hours motions circle, still repeating  
The beat moves on itself  
The beat moves on itself Everyday my love  
Crazy, crazy days are gone  
When I come home  
And we're finally alone I'm caught in your arms safe from a morning  
No one walks out on the tightrope today my love  
The beat moves on itself  
The beat moves on itself Everyday my love  
Crazy, crazy days are gone  
When I come home  
Crazy, crazy days are gone  
When I come home We awoke at the edge of a summer  
New days began to stretch their legs  
And the tempo's changing the compliancy  
The needle finds the groove to free us tonight We awoke on the edge of this winter  
The ice melts off and flows in like a song  
The record plays but the needles old  
It lets the player take control Move the speakers how they're told  
To make us march for something more  
Music is a sedative  
And you put out what you put in
