

City of Ommz

Omar LinX

[chorus]

Old friend where you been

Where you headed to

Can I roll, tag along, get a better view

The road i'm taking is just skull and bones

And now ill take you but im off to the city of ommz

Old friend where you been

Where you headed to

Can I roll, tag along, get a better view

The road that i taking is just skull and bones

And now ill take you but im off to the city of ommz

I been-regaining my focus

Reclaiming my hopes

Every little thing I been training I own this

No problems here

No sir, im so certain

I got a bright future, the sunburn and so worth it

Im feeling closer to my dream then I ever been

The limousine is literally outside the street

Im half asleep so nothing here is out of reach

I make something from nothing

Go ahead and run a beat

Call me a dreamer but I have seen it

Thats why im breathing

Oh yeah I play the f*cking side like a wild receiver

I got what you need, what you need

Is what I deliver

Im in the sky looking down yeah Im high as ever

Im elite, f-16 fighter pilot

I got my head in the clouds

So I can write about it

But I fly alone, never read the dialogue

God just doing my thing

Just cut the scene and retire

[chorus]

Old friend where you been

Where you headed to

Can I roll, tag along, get a better view

The road that i taking is just skull and bones

And now ill take you but im off to the city of ommz
Old friend where you been
Where you headed to
Can I roll, tag along, get a better view
The road that i taking is just skull and bones
And now ill take you but im off to the city of ommz
yeah, now any dreamer can dream,
but if he's driven it's me
see I could say what you think
and I say what I see
yo im swerving on the shoulder with the road
I still hit the gas
Come a Daytona ommz I just rip the track
Ive been astray in vacant slumber for many summers
The citys known to steal your soul and take you under
But I refuse
Ive been sick so im immune, a better shot at life
Is where im headed to
This time I promise im the hottest artist, hot as august
In the middle of nevada
In the desert, starvin'
No mirage could fool me I see the truth
Through the billow of smoke
I see a better view
Im out a place my mind is livin out of state
Im here to stay surprise baby you know the name
Its Tdot the the CN tower, the seat of power
Tell these exes to wrap it up
The city's ours
[chorus]
Old friend where you been
Where you headed to
Can I roll, tag along, get a better view
The road that i taking is just skull and bones
And now ill take you but im off to the city of ommz
Old friend where you been
Where you headed to
Can I roll, tag along, get a better view
The road that i taking is just skull and bones
And now ill take you but im off to the city of ommz
