Black Magic Show (Introducing)

Elefant

Loosen your ties, en joy the show
Hey man don't be sad man
It's always fun to lose control
Blinded by the bright lights

And it already has begun,
The freaks have come out tonight
And it already has begun,
There's no different between
Wrong and right
Welcome to the black magic show

The devil sings a song for you
Hey man why you staring,
He'll make you think that it's all true
It's all an illusion, yeah

And it already has begun,
The king has lost his mind
And it already has begun,
It's no reason for you to cry
Welcome to the black magic show,
C'mon!

And it already has begun,
There's no room here for you
And it already has begun,
There's nothing, nothing you can do
This is call the black magic show
