

# Where We Belong

Jamie O'neal

Say goodbye, maybe that's one way to go  
Walk away and say it's over, call it history  
Do I believe we'd better off apart?  
Can I see my world without you in it?  
Baby, not for a single minute  
Let the moon give up the night  
All the stars leave Heaven on high  
The sun would burn out before I'd ever lose you  
We can get over any wall  
If we have to fly, run, climb or crawl  
Love will always lead us back where we belong  
Just today, I woke up shakin' from a dream  
I got a glimpse of life without you  
All the good was gone  
Then I realized you were lying next to me  
I knew right then, baby, come whatever  
When the goin' gets tough, we'll face it together  
Let the moon give up the night  
All the stars leave Heaven on high  
The sun would burn out before I'd ever lose you  
We can get over any wall  
If we have to fly, run, climb or crawl  
Love will always lead us back where we belong  
Baby, all we gotta do is reach out  
No layin' blame, no guilty party  
Lay our daggers down on the ground  
Hold each other and say we're sorry  
Let the moon give up the night  
All the stars leave Heaven on high  
The sun would burn out before I'd ever lose you  
We can get over any wall  
If we have to fly, run, climb or crawl  
Love will always lead us back where we belong  
Yeah, love is gonna lead us back where we belong
