

Fight or Flight

Pseudosix

We're ready to go Ticking like a bomb that's about to blow It's taking control Pulling at your feet like an
undertow You don't really know

If you're all that capable But you've been told Don't pretend you're stupid Figure it out
Sort it out Go make yourself useful You're better than dead You really made a mess with the words you said So
easily fed

The flames of the fire rise above your head They want to be led
You've joined the ranks instead There's a voice in your head I can't figure it out Any more than the generation
before me I can't figure it out How we got where we are today I can't figure it out
Any more than the generation before me I can't figure it out We've got to fight not to fade away
