

Light Up or Leave Me Alone

Traffic

Sometimes I feel like I'm fading away
You're looking at me, I've got nothing to say
Don't make me angry with the games that you play Either light up or leave me alone Walk in my room, you lie
on my bed
Open your mouth, shoot someone dead
All of a sudden you're inside my head Either light up or leave me alone Spending my bread like it grew on a tree
You're trying to tell me 'bout the birds and the bees
The skirt that you're wearing is way past your knees Either light up or leave me alone You're up all night
preaching your mind
Come home in the morning with your latest find
I'm gonna have to lay it to you straight on the line Either light up or leave me alone
