

# Dead End Love

## Gob

While you skip the night, I stay up till 5  
We may meet again when semester ends  
So with all my might, I sit down to write  
Here lies precious pen, failure to the end  
And while you were gone I let my sores out bleeding open  
I was cold, I was sold, I met a road sign leading nowhere  
Double crossed and erased I let a monster run me over  
I was lost, don't know where there was a road sign leading nowhere  
When I got hypnotized, recounted only lies  
Only fooled myself, kept unsafe in hell  
I can't blame the scarecrows, I get sad for nothing  
Introduce me to something that can move

And while you were gone I let my sores out bleeding open  
I was cold, I was sold, I met a road sign leading nowhere  
Double crossed and erased I let a monster run me over  
I was lost, don't know where there was a road sign leading nowhere  
C'mon

And while you were gone I let my sores out bleeding open  
I was cold, I was sold, I met a road sign leading nowhere  
Double crossed and erased I let a monster run me over  
I was lost, don't know where there was a road sign leading nowhere  
A road sign leading nowhere  
A road sign leading nowhere
