

# Colors

Eric Saade

I need adrenaline to cover All my sins  
Back to be crazy  
Back to be crazy  
I'm living carelessly like I'm seventeen Do what I wanna  
Be who I wanna  
Round and round we fly  
Raise your glasses and toss this life  
Bring it to the top  
And up we go We're higher than the sun  
It's spinning round like one million pills in my mind  
I can feel my dreams slowly coming to life  
Take another sip from this trip  
Drink it up I need to recover from black and white to colors  
Let's stained it  
Leave the rest and no need to stress it  
There's no need to stress it  
So let us freeze the time to feel forever young  
And enjoy all the madness Enjoy all the madness  
Round and round we fly  
Raise your glasses  
and toss this life  
Bring it to the top  
And up we go  
We're higher than the sun It's spinning round like one million pills in my mind  
I can feel my dreams slowly coming to life  
Take another sip from this trip  
Drink it up  
I need to recover from black and white to colors  
I'm living carelessly like I'm seventeen Do what I wanna  
It's spinning round like one million pills in my mind  
I can feel my dreams slowly coming to life  
Take another sip from this trip  
Drink it up I need to recover from black and white to colors  
It's spinning round like one million pills in my mind  
So move a little closer  
We're wasting no time  
We take another sip from this cup  
Drink it up I need to recover from black and white to colors  
Black and white to colors

To colors
