

# Oxygen

## Nefertitti Avani

Verse 1 When you touched me I lost my breath, breath, breath

And when you kiss me all I am left, left, left

If you see me breathing heavy in my chest, chest, chest

I need oxygen, oxygen, oxygen Verse 2 Your love takes me into outer space, space, space

Im tryna keep up with your pace, pace, pace

I know you can see it in my face, face, face

I need oxygen, oxygen, oxygen Verse 3 Your not from here my body can tell, tell, tell

Just for you, my love ships at sail, sail, sail

Dont leave, rescue me you cant fail, fail, fail

Being my oxygen, oxygen, oxygen Bridge Your face is my heaven on earth, earth, earth

Before you went home Im glad you stopped here first, first, first

If the angels miss you too much tell them it was worth, worth, worth

Being my oxygen, oxygen, oxygen
