

Get Out, Get Out

Burning Image

Get out! Get out! anyway you can
Well you can't blame something when there's nothing out there
Run out run out run away with me
Well I can't stay here and it might as well be somewhere
Lookout lookout the devil is everywhere
If you don't watch out he will sell your soul for nothing Well this can't be wrong
Well we can't go back
Now we've made our choice
So I say, let's go! Come on, come on, come and play with me
If you don't get scared this will be your life forever
I know, I know something isn't right
And I'd call someone but I can't even remember
Come on, come on you know he's a whore
If you stop this game, well you might as well surrender
Get out! Get out! anyway you can
Well you've gone this far, isn't this the life you came for? Get out! Get out! while you can!
