

Now

Opiate for the Masses

Now

Still I smell like im inside you

Now

It hurts to breath the air outside you You share yourself

You change you fate

You seldom bleed a later date

Should never pull it out to late

That's when it starts to incubate Now

I never play your anger

I just want my life

But i could be your tapeworm

If you like Hey

Who told you you could take me down

Why would you break me down

So we can bring this circle round Now

You think I should congratulate you

Now

You feel as though i regulate you You share yourself

you change you fate

You seldom bleed a later date

Should never pull it out to late

Thats when it starts to incubate Now

You wanna play my anger

You wanna take my life

I'm gonna be your tape worm

Now your mine Hey

Who told you you could take me down

Why would you break me down

So we can bring this circle round Hey

Who told you you could take you down

Why dont you break me down

So we can bring this circle round I never thought you'd take me down

I never thought you'd break me down

Don't wanna bring this cicrle round

Don't wanna bring this cicrle round Hey

Who told you you could take me down

Why would you break me down

So we can bring this cicrle round Hey

Who told you you could take you down

Why would you breake me down
So we can bring this circle round
