Fall

Cider Sky

Hanging by the window
I?ve been dreaming about you
Feeling like I am ready
It?s like I am ready for you
I crossed the desert
I crossed the sky
Look for you forever
Wake up the night
Just around the corner
Maybe tonight I?ll found you
Oh some people fall some people fall apart
Some people fall while running in the dark
Some people fall when they run out of luck
Some people some people fall in love
La la la
Every day I miss you
Like a song in my heart
I can hear the ending
But I don?t know how it starts
I crossed the desert
I crossed the sky
Look for you forever
Wake up the night

Just around the corner
Maybe tonight I?ll find you
Oh some people fall some people fall apart
Some people fall while running in the dark
Some people fall when they run out of luck
Some people fall some people fall in love
Some people fall some people fall apart
Some people fall while running in the dark
Some people fall when they run out of luck
Some people fall some people fall in love
Everyday people catching the sunrise
Watching the oceans flow
Everyday people catching the sunrise
Watching the oceans flow
Oh some people fall some people fall apart

Some people fall while running in the dark
Some people fall when they run out of luck
Some people fall some people fall in love
Oh some people fall some people fall apart
Some people fall while running in the dark
Some people fall when they run out of luck
Some people fall some people fall in love
