

# Keep Believing

Bob Mould

And now the hearts are beating  
And all our sadness has been washed away  
The drug that keeps me breathing  
I stick it in me every day The needle, the sound  
This groove it goes around An anthem keeps repeating  
I'm dialing up a song from far away  
And you can't get this feeling anywhere  
But here, right here, right now No choice, can't leave  
I have to keep believing Bring me thoughts and words  
Pass me the revolver  
I can see for miles  
And everything's in color Rock and roll all night  
Until I feel the thunder  
I got a handle on some  
Complicated fun We're all sniffing glue  
Pleasures so unknown  
A circle drawn in blue  
The murmur baritone Picnic on a Pedro lawn  
Heaven took that monkey song  
Never mind the battle won  
Could you be the loveless one? Always keep believing  
Have to keep believing  
Never lose that feeling  
Have to keep believing
