How?

outcum

One, two, three, four
What if there is nothing else for us after all this?
I don't care, I don't mind, just as long as we find some time
Just come back, I'll stay out of the way
And be all the things you need, another mouth to feed
How can I be sure again, once more?
How can I find time to be with you again?
How can I give you the answers you need?
When all I possess is a melody
Yeah, how can I take up the air that you breathe?
When all I possess is a melody
How can I be sure again, once more?

I don't care, I don't mind, just as long as we find some time
When you come back, I'll go out of my way
To be all the things you need, another mouth to feed
How can I give you the answers you need?
When all I possess is a melody
Yeah, how can I take up the air that you breathe?
When all I possess is a melody
How can I find time to be with you again?
When you come back, I'll go out of my way
To be all the things you need, another mouth to feed
