

The Beginning

As I Lay Dying

From here to eternity we begin understanding
From here to eternity
I see who you are and who else can compare
I meant what I said, I promised to stand by your side
Until the end, that's where we begin
Until the end, that's where we begin
From here to eternity we begin understanding
It is our hearts that define what has meaning in life
Some will ask how can this be but it was you who made me feel
From here to eternity we begin understanding
Until the end, that's where we begin
Until the end, that's where we begin
Until the end, that's where we begin
