Emptiness

Nibdem

This emptiness that I feel that really just ain't my style
Even though it hurts, gotta make it work baby
This emptiness that I feel is gonna be here a while
Feeling kinda strange, now that your away baby
This emptiness that I feel, it really just ain't my style
Even though it hurts, gotta make it work baby
It's hard to believe, you're not here with me
Where will I go, where will I be
Less without you, you were my dreams
Better move on, as hard as it seems
I try to tell myself forget the past
I think that I'm losing my mind 'cause you ain't coming back
I gotta play it right, keep it cool, keep control
I'm tryin' all this time to let you go
I miss you and I want you
I really gotta have you, one more time
Boy I love you and I need you
I really gotta have you, one more time
This emptiness that I feel is gonna be here a while
Feeling kinda strange, now that your away baby
This emptiness that I feel, it really just ain't my style
Even though it hurts, gotta make it work baby
This emptiness that I feel is gonna be here a while
Feeling kinda strange, now that your away baby
This emptiness that I feel, it really just ain't my style
Even though it hurts, gotta make it work baby
I miss you and I want you
I really gotta have you, one more time
The harder I try, the deeper I sink

But love has me blind, I can't even think
It's only a while, then it will leave
And then I'll move on, this really ain't me
Whatever am I gonna do
You got me stressin' over losin' you
I gotta keep it right, keep it cool, keep control
Tryin' all the time to let you go
Boy I love you and I need you
I really gotta have you, one more time

This emptiness that I feel is gonna be here a while
Feeling kinda strange, now that your away baby
This emptiness that I feel, it really just ain't my style
Even though it hurts, gotta make it work baby
This emptiness in the way you makin' me feel
Is it real, do I wanna continue lovin' you still
Here's the deal, do I hang on to something that's been killed
Or move on and stay strong and continue to walk uphill
But I will always own memories in my mind
But until, it's gonna take all of me all of the time to unwind
Forget about what we had and realize
I was blind before but now you're gonna be fine
This emptiness that I feel is gonna be here a while
Feeling kinda strange, now that your away baby
This emptiness that I feel, it really just ain't my style
Even though it hurts, you gotta make it work baby
This emptiness that I feel is gonna be here a while
Feeling kinda strange, now that your away baby
This emptiness that I feel, it really just ain't my style
Even though it hurts, you gotta make it work baby
