Try Your Best

Kaiser Chiefs

I can't do it any quicker I don't want it any slicker As far as the eye can see Is miles and miles of icy seaSo try your best And think about it later Or you will never knowI don't feel fear anymore But I can't risk getting mauled As far as the ear can hear The wave is coming loud and clearSo try your best And think about it later Or you will never knowSo try your best And think about it later Or you will never know Which way your life could go And you'll know when you knowSo try your best And think about it later Or you will never know Which way your life could go And you'll know when you know
