Same Song

Anastacia

Boy, these are crazy times
It nearly blows my mind, living in this messed up world
You're not the one to blame
But if it's all the same to you we gotta get along
New possibilities in an endless field of dreams for sure
We're gonna get there someday, hey
Throw your hands up in the air, living life without a care
So much for us all to share underneath the sun
Dancing, moving side to side, come on, you'll all enjoy the ride
It won't be long 'cause we'll all be singing the same song
Those empty promises of the things we never did
I know, oh we wanna say
There's something in us all that makes his beautiful for sure
There's gotta be a better way
Throw your hands up in the air, living life without a care
So much for us all to share underneath the sun
Dancing, moving side to side, come on, you'll all enjoy the ride
It won't be long 'cause we'll all be singing the same song
Search deep and you will find
Don't let it blow your mind, gets better every time, oh yeah
The struggle on the street
The pressure and the heat it never bothered me, oh
I finish preaching now so let me show you how it's gonna be
I said you and me
New possibilities in an endless field of dreams I know
We're gonna get there someday
Throw your hands up in the air, living life without a care
So much for us all to share underneath the sun
Dancing, moving side to side, come on, you'll all enjoy the ride
It won't be long 'cause we'll all be singing the same song
Throw your hands up in the air, living life without a care
So much for us all to share underneath the sun
Dancing, moving side to side, come on, you'll all enjoy the ride
It won't be long 'cause we'll all be singing the same song
