

# So Cold

## Yaakov Chesed

So much beauty surrounds you  
But you're so confused

You're so lost  
The flowers and valleys hypnotize you  
But you're so used  
You're so cold  
I've been looking my whole life  
In search of salvation for my situation

And through a crack in my heart there shines a light  
A contemplation about my nation  
The world feeds me nothing  
I'm starving from the outside in  
Cuz I feel so empty and I don't know where to begin  
Cuz I've been starving grabbing whatever I can

To fill me up with my sound again  
So much beauty surrounds you  
But you're so confused  
You're so lost  
The flowers and valleys hypnotize you  
But you're so used

You're so cold  
Now that I'm getting old  
A little wiser and I can hold onto a sound  
A remnant from years old  
Cold eyes stare me up and down  
But I don't frown cuz ive been crowned

A servant of a holy sound  
A servant of a holy ground  
So much beauty surrounds you  
But you're so confused  
You're so lost  
The flowers and valleys hypnotize you

But you're so used  
You're so cold
