## Endo

Intermolecular structures the cloning of lovers  
Secrets and the lies that stem within  
The falling of Hitler the infamous killer  
Take my soul and rape and fuck me Take it away, don't wait tomorrow  
Open your eyes and let me in Stop all this hatred that stands before me  
Take what you want me to take inside you  
Break what you want me to break before me  
Take what you want leave me empty Take it away, don't wait tomorrow  
Open your eyes and let me in So you feel empty, so you feel  
Here and now to let me in  
Here and now someone help me Take it away, don't wait tomorrow  
Open your eyes and let me in, let me in
