

Down and Out

Tantric

Coming up for air so I can
Check myself again and I stand
Proven to the man sheltered
Confidence we tend to shelf and
Unexpected hunger drives me
Just shut up and stand beside me
I don't need your understanding
I don't need to change a damn thing

Though I'm used to have you here
It's doesn't change the man I was
When you found me
And there was no one else around me yeah
Just turn the page and watch me grow
There's so many things that you don
