

Same Name

Field Music

Some strange magic told me
It was meant to be
You have to admire then go
You pick it up so long so just
And thermal thrill but doesn't it always Start this way (start this way)
You don't have to tell me
How I came to this
Then I should have rolled my eyes
You already gone
No way that was a genuine thrill doesn't it always Start this way (start this way)
Remember when
You said we have the same name so it must be faith
I didn't have the heart to say
It's just a thing around here
You say we want the same things
With the strange face
A little bit longer is that what you wanted to hear Some strange magic told me
It was meant to be
And if you don't feel it too
One of us is wrong
I know it's a genuine thrill
Doesn't it always
Start this way (start this way) Remember when
You said we have the same name so it must be faith
I didn't have the heart to say
It's just a thing around here
You say we want the same things
With the strange face
A little bit longer is that what you wanted to hear You said we have the same name so it must be faith
I didn't have the heart to say
It's just a thing around here
You say we want the same things
With the strange face
A little bit longer is that what you wanted to hear
