

# Crimes Against Humanity

## Sacred Reich

Toxins, pollutants and poisonous gases  
Without notice take their toll on the masses  
Air becomes thicker than the water we drink  
People unaware of the spread of disease  
Smoke fills the sky and the sun disappears  
Rain from above is like acid filled tears  
The fragile balance of sky and earth  
Has been altered forever harmony disturbed  
Towering temples of modernization  
Megatropolis monument to civilization  
Pollution and waste is direct indication  
To the growing problem of the world's situation  
Smoke fills the sky the sun disappears  
Rain from above is like acid filled tears  
The fragile balance of sky and earth  
Has been altered forever harmony disturbed  
What will it take to make us see?  
These are crimes against humanity  
Not only you, not only me but even our future society  
These are crimes against humanity  
Crimes, crimes, crimes  
Pain and suffering are what can be found  
Violence and hatred are what abound  
Building the weapons that we can't use  
Can't we see they have only one use  
We need more compassion  
Not more war planes, are we so blind  
Uncaring insane brought into this world with nothing  
And with nothing we're destined to depart  
What will it take to make us see?  
These are crimes against humanity  
Not only you, not only me but even our future society  
These are crimes against humanity  
Crimes, crimes  
Crimes against humanity
