

# Special Girl

## Beerlover

Into each life a little sunlight wants to shine  
Let me tell you, fortune life that once was mine  
She was a special girl and she meant the world to me  
And I gave her everything  
When I found her, I'd been looking everywhere  
And when I lost her, I was lost beyond despair  
She was a special girl and she meant the world to me  
And I gave her everything  
Dreams are hard to touch, could it be I love her too much

She was a special girl and she meant the world to me  
And I gave her everything  
Bottom line is she was fine in everyway  
And it's not with hesitation that I say  
She was a special girl and she meant the world to me  
And I gave her everything  
Dreams they come and go  
But thoughts like love will always grow  
Special girl
