

Our Friend Owsley Stanley III

The Master's Apprentices

A friend of mine, he introduced me to a man inside my mind,
thought I never knew the answers to that life I'd never find

At the first it seemed so strange, I could see inside my head,
found it hard to rearrange -- through the stratosphere I sped

If you want to know some answers to life's questions come with me,
I'm sure that friend of mine can help you, like I know he did with me
