

Is She Better

Caitlin Hart

She walks in the room and I want to die wearing her black dress with her head up high
she thinks she's your beauty queen I shoot her a smile while she glares back at me she's
having a blast with all your friends stays at the bar till the bitter end there's a flower where the scars used to be
she's young wild and so pretty is she better is she better is she better than me is she better is she better is she
better me

is she better is she better is she better then me do you think that little girl is better then me

you take her home now I'm all alone crying to my friends on the telephone I close my eyes and its all I see her
stupid face staring back at me she swallows

all your dirty lies you let your love go deep inside I hope now she's had her fill I bet you wish she'd taken her
little pill

is she better is she better is she better then me is she better is she better is she better then me is she better is she
better

is she better than me does that little girl write you love letters like me is she better is she better is she better than
me

is she better is she better is she better then me is she better is she better is she better then me do you think that
little

bitch is better then me

is she better is she better is she better than me is she better is she better is she better then me
do you look at her the way you used to look at me that smile of yours that made me believe but you were lying
through your

teeth is she better is she better is she better then me is she better is she better is she better then me is she better
is she better is she better then me do you let that little girl wear your sweaters like me is she better is she better
is she

better than me is she better is she better is she better then me is she better is she better is she better then me does
that

little girl write you love letters like me is she better is she better is she better then me is she better is she better is
she better then me is she better is she better is she better then me do you really think that girl fucks you better
then me

is she better is she better is she better then me do you think that little girl is better then me is she better is she
better is she better

then me do you really think that girl does it better then me.
