It Started With a Mixx

Los Campesinos!

Trying to find the perfect match between pretentious and pop
Some crappy artwork that took way, way too long to draw
Handwritten track listing restarted every time the pen smudged
Encoded title doesn't give away as much as it shouldIt started with a mixx
(How did it come to this?)
I think it always willTrying to find the perfect match between pretentious and pop
Some crappy artwork that took way, way too long to draw
Handwritten track listing restarted every time the pen smudged
Encoded title doesn't give away as much as it shouldIt started with a mixx
(How did it come to this?)
I think it always willIt started with a mixx
I think it always will
It started with a mixx
I think it always will
