

# See the Light

## Earth, Wind & Fire

Lookin' through the clouds, what do you see?  
Sky of gases, child in need  
Troubles everywhere, more than I can bear  
So I'm searchin' from within Help them see the light  
The light I'm a blossom in the sun, sunshine of love  
Singing loud to the one I love above  
Shine on sun, let your light guide a way  
For so long there's been such darkness  
Got to be a better way, yeah  
Keep me Lord and help me to grow bold  
So I may reap the fruits of a free and happy soul Help them see the light  
Help them see the light Give me strength when temptation calls  
Lift me up when life's battles make me fall  
Shelter me from the evils and wrongs  
So when you call dear Lord, I said, "I'll be strong"  
Walk with me, when the stormy nights are cold  
In your hand lies all control on it  
Master then hey, when my final song is sung  
With Your mercy, I pray that You'll say, "Well done" Help them see the light  
Help them see the light Help them see the light  
Help them see the light Help them see the light  
Help them see the light (Help them see the light)  
Help them see the light
