

Psychic Horns

Mayhem

Subordination to another will
Sophisticated subtle techniques
Mind psyche wide opened
Stimulated triggers
Thought forms of malevolence and fear
In the veins of the floating genocide
Robot of voids by ultrasonic stimulations
Holds down the vibrational field
Rituals take place on grid of vortex
points
Terror horror and hatred created
Worship of deconstructive negative pole
R-complex evolves the vril-force
Nourishment for the non-physical forms
To contact and manifest entities of another world
Flying through the depths of space
Someones hand on the wheel
From where the lizard eye
Focuses the infinite line of alienation
Enter the gate of eternal lights
Appear another existence form
The immerge bended into the abyss
Inner world in the depths of the planet
Where the inverted sun never set
Illumination the enormous entities
Hiding them from the human eyes
Converse tubes to the surfaces and back
Only certain chosen can enter
