Pump the Brakes

Refused

Genocide on genocide
Destroyed knowledge crushed pride
Lost culture to civilization
Reduced abused beyond dignityContemplation exploitation
Ring the bell of information
Blocked the truth convincing, controlling
Held us down unthinking, unknowingOppressed so many for so long
We've ignored the facts and moved along
We gotta pump the brakes, wasting resources
Face some facts and detect the causes'Cause our progression equals destruction
People getting killed by government corruption
'Cause making most of the land
That's the plan you gotta understandThat fifty years down the line
There won't be no time, the time is nowDrained so much for so long
We've ignored the costs
And moved along
Time to pump the brakes
Gotta pump the brakes
Pump, pump the brakes
